

A critical mineral growth story rebuilding its production profile

RAMBLER is a mining and development company that in November 2012 brought its first mine into commercial production. It has a 100% ownership in the Ming Copper-Gold Mine, a fully operational base and precious metals processing facility and year-round bulk storage and shipping facility; all located on the Baie Verte peninsula, Newfoundland and Labrador, Canada.

Rambler's focus is to regain its production profile at 1,350 metric tonnes per day at a target grade of 2% copper and evaluate expansion opportunities from that base.

INVESTMENT HIGHLIGHTS

- ❑ Operating underground high-grade copper and gold mine in eastern Canada
- ❑ Significant progress on the turn-around already achieved
- ❑ Excellent mining jurisdiction in the province of Newfoundland and Labrador
- ❑ > 425,000 tonnes of contained copper in the Measured and Indicated Mineral Resource
- ❑ Potential +20 years mine life based on internal company mine plan, with expansion potential and exploration upside
- ❑ Additional local tenements in the portfolio

Our Mission is “To deliver superior returns as a responsible Canadian mining company.”

Mineral Resources are not Mineral Reserves and have not demonstrated economic viability. All figures are rounded to reflect the accuracy of the estimate. Cut-off grades of 1.0 % copper for the massive sulphides, 1.25 grammes per tonne gold for any gold zones and 1.0 % copper for the stringer sulphides have been used in the estimate. Resources are inclusive of reserves. Please visit our website for all notes pertaining to Ming Mine Mineral Resource Estimate.
